

Welcome to - Curie House - Courage - Honour - Passion

Marie Skłodowska Curie was a two-time Nobel Prize winning Polish Physicist and Chemist who is most renowned for her pioneering work in radioactivity, specifically relating to her continual efforts to finding a cure for Cancer.

Throughout her time, Marie Curie was renowned for her courage, honour and passion during her ground-breaking endeavours, in which she never succumbed to failure in the face of adversity.

It is the students of *Curie House* who show such similar tenacity and traits; Courageous in their unlimited quest for knowledge and advancements, Honourable in their endeavours and fiercely Passionate in all that they undertake.

Marie Curie Cancer Care is a devoted charity set up to help all those suffering with terminal illnesses as well as their families. As part of *Curie House*, we will be attached to this charity and endeavour to do our utmost in supporting this fantastic charitable organisation.
